Reference Available On Request

June, 2022

Woodgreen's Charity Shop

Volunteer

- Customer Service
- Communication
- Time Management
- Organisation
- Money-handling

PERSONAL STATEMENT

As a student attending Access Creative College in Norwich, I am pursuing a career in Software Development via a T-Level college course. This course gives me the academic and practical skills needed and hands-on experience. I am ambitious and keen to work in software development whilst keeping an open mind about which sector best suits my skills. I have already written several applications; most are available on [GitHub](#) and [Replit](#). I have also written a [Portfolio Website](#) using React and TailwindCSS.

My strengths lie in front-end web development, and I am considering becoming a full-stack developer.
